

I am sending this comment to share my views regarding the possible displacement of our local K-LOVE station on our FM radio band.

K-LOVE has had a remarkable influence for our family and is one of the few positive and encouraging stations available in our area. It remains the only station that I am certain my five year old can listen to unattended and not be bombarded with violent concepts and characters exhibiting negative behaviors and language.

If the K-LOVE stations in our area were to be lost, I do not think there would be an adequate replacement available. I have seen many other vehicles with K-LOVE stickers and think that there would be many people and families affected with the negative impact of not having the positive and encouraging effects of K-LOVE and the message proclaimed by the stations. There is not a LPFM station that I know of that could ever replace the fantastic programming that is available on K-LOVE.

In this day of public programming where our family cannot sit down to watch a prime time show without running the risk of being impacted by some negative or inappropriate ad. This is true even when we try to watch sports programs together. I can honestly say that I cannot count the times on both hands that in the last year our five year old has had to turn away from inappropriate material that was being promoted by radio or television. This occurs entirely too often and as I mentioned before is not a concern when we are listening to any of the Nebraska K-LOVE stations which are heard on 91.9, 89.9 and 88.1 please do not remove our K-LOVE stations.

Sincerely,

Thomas D. Holland
